Software Engineer • Portfolio: loganbaysinger.us

Detail oriented full-time Computer Science student with hands-on experience in multiple databases, programming languages, web development and game development – seeking a full-time position in Software Engineering primarily for Game Development but open to others. I am experienced with Game Engines such as Unity and Unreal Engine and have performed in game production and anti-cheat enforcement as well as data analysis roles. I would be interested in taking a leadership role in the future.

Education:

- **University of Central Florida:**
 - **Computer Science – B.S.** (*Pending – Expected Fall 2026*)
 - Software Engineering
 - **Digital Media – B.A., Game Track** (*Pending – Expected Fall 2026*)
- **Seminole State College:**
 - Associate in Arts (A.A) – General Education, [Spring 2021]

Work Experience:

- **Software Engineering Lead – Anything but a Gun** (*September 2025 – May 2026*): Lead development of the software and programming for Unity game. Collaborated across teams and ensured usable packaged software. Lead core development, Steam page, and web development. https://store.steampowered.com/app/4413900/Anything_But_A_Gun/
- **Co-Lead Software Engineering – ThermoFlux** (*March 2025 – November 2025*): Main software and programming for Unity game. Leading game design principles, iterative design, testing, and software development.
Itch.io: <https://rangerhalt.itch.io/thermoflux>
- **Work Study – Walkabout the Galaxy (Hosted by UCF)** (*January 2022 – August 2025*): Edit videos and design visuals to support social media outreach on platforms such as YouTube, Instagram, and TikTok. Utilize Adobe Premiere Pro for video editing and Adobe Photoshop for graphic design. Contribute to website updates in their website builder platform.
